Toronto_60435_2019_Day194to200.csv

The results below are what the student results should look like for the Toronto_60435_2019_Day194to200.csv dataset used in CHM 135 Experiment 1.

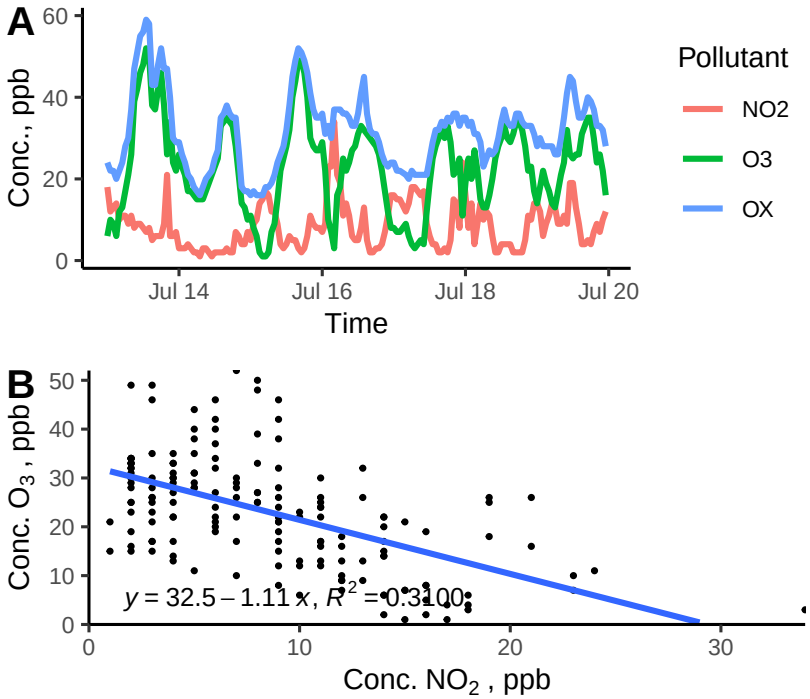

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O_3 vs. NO_2; the equation of the line is displayed in the lower left corner.

Pollutant	mean	sd	median	min	max
NO2	8.5	5.7	8	1	34
O3	23.1	11.3	24	1	52
OX	31.6	9.4	32	16	59
NO2_8hr	8.4	4.2	8	2	21
O3_8hr	23.4	9.6	23	4	45
OX_8hr	31.7	8.3	33	16	53

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not substract points, but make a note of it.
