

Toronto_60435_2019_Day188to194.csv

The results below are what the student results should look like for the Toronto_60435_2019_Day188to194.csv dataset used in CHM 135 Experiment 1.

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O₃ vs. NO₂; the equation of the line is displayed in the lower left corner.

Pollutant	mean	sd	median	min	max
NO ₂	11.6	9.2	9	0	45
O ₃	23.1	13.5	22	1	55
OX	34.7	11.5	32	16	59
NO ₂ _8hr	11.7	7.6	9	0	38
O ₃ _8hr	23.2	12.0	21	5	49
OX_8hr	34.9	10.8	33	17	55

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
