

Toronto_60435_2019_Day195to201.csv

The results below are what the student results should look like for the Toronto_60435_2019_Day195to201.csv dataset used in CHM 135 Experiment 1.

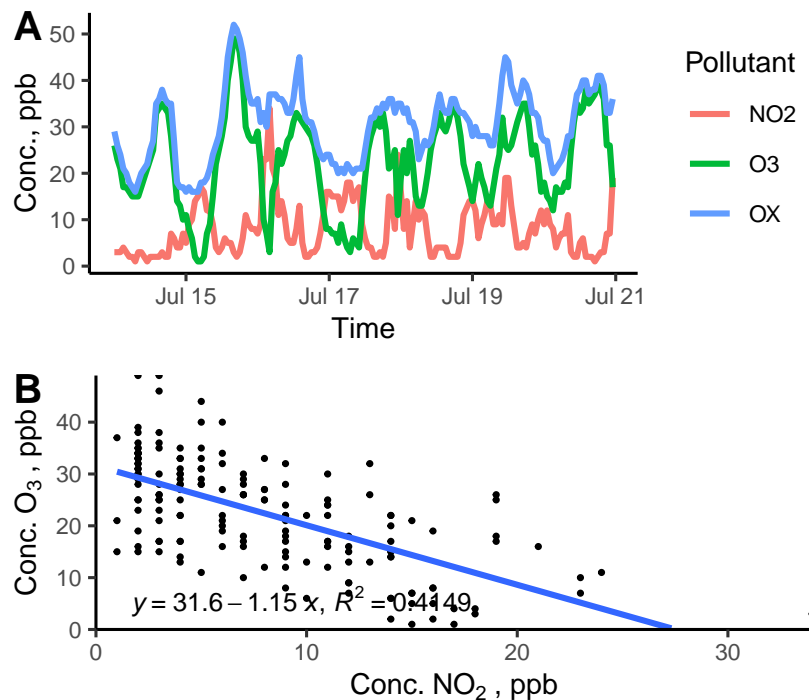

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O₃ vs. NO₂; the equation of the line is displayed in the lower left corner.

Pollutant	mean	sd	median	min	max
NO ₂	8.0	5.8	7	1	34
O ₃	22.4	10.3	22	1	49
OX	30.4	8.0	32	16	52
NO ₂ _8hr	8.1	4.4	8	2	21
O ₃ _8hr	22.3	8.9	22	4	43
OX_8hr	30.4	7.0	31	16	48

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
