Toronto_60435_2019_Day183to189.csv

The results below are what the student results should look like for the Toronto_60435_2019_Day183to189.csv dataset used in CHM 135 Experiment 1.

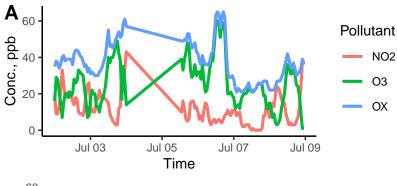

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O₃ vs. NO₂; the equation of the line is displayed in the lower left corner.

Conc. O ₃ , ppb B	30 - 20 -	y = 35 - 0.798	$x, R^2 = 0.2718$		
	0 +	10	20	30	40
			Conc. NO ₂	, ppb	

Pollutant sd median min mean max NO₂ 11.8 8.5 10 o 43 О3 25.6 13.0 23 1 60 OX36 37.4 11.3 21 65 NO₂_8hr 11.3 6.0 11 0 25 O3_8hr 6 26.1 10.9 24 57 OX 8hr 10.6 22 62 37.4 37

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not substract points, but make a note of it.
