Toronto_60435_2019_Day13to19.csv

The results below are what the student results should look like for the Toronto_60435_2019_Day13to19.csv dataset used in CHM 135 Experiment 1.

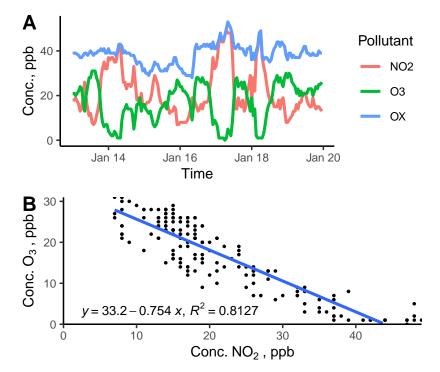

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O₃ vs. NO₂; the equation of the line is displayed in the lower left corner.

| Pollutant | mean | sd | median | min | max |
|-----------------|------|------|--------|-----|-----|
| NO ₂ | 21.5 | 10.5 | 18 | 7 | 49 |
| O ₃ | 17.0 | 8.8 | 19 | O | 31 |
| OX | 38.5 | 4.6 | 39 | 28 | 53 |
| NO2_8hr | 21.7 | 9.4 | 18 | 8 | 47 |
| O3_8hr | 16.8 | 7.8 | 18 | 1 | 29 |
| OX_8hr | 38.4 | 4.1 | 39 | 29 | 48 |

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not substract points, but make a note of it.
